

STENCILEX

> A COATING AS UNIQUE AS YOU

ADEX

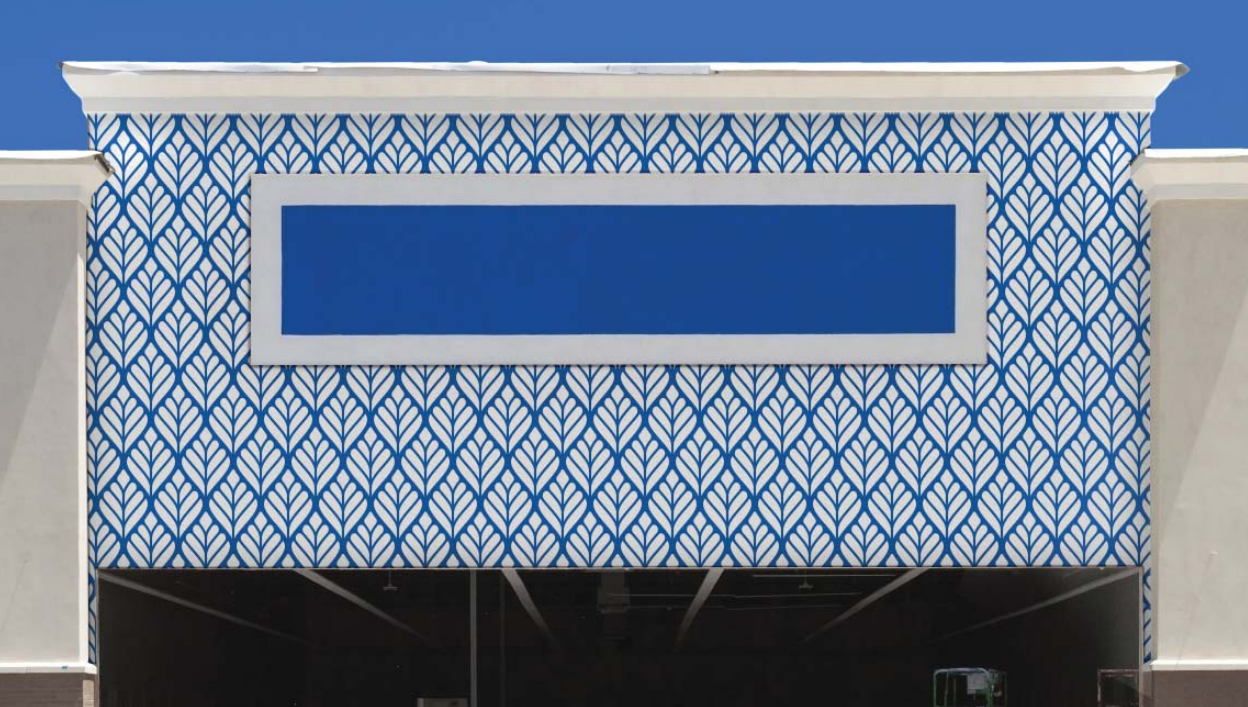

architectural COATINGS

STENCILEX is a design program that allows users to structure their creativity and imagination into real-world exterior renderings.

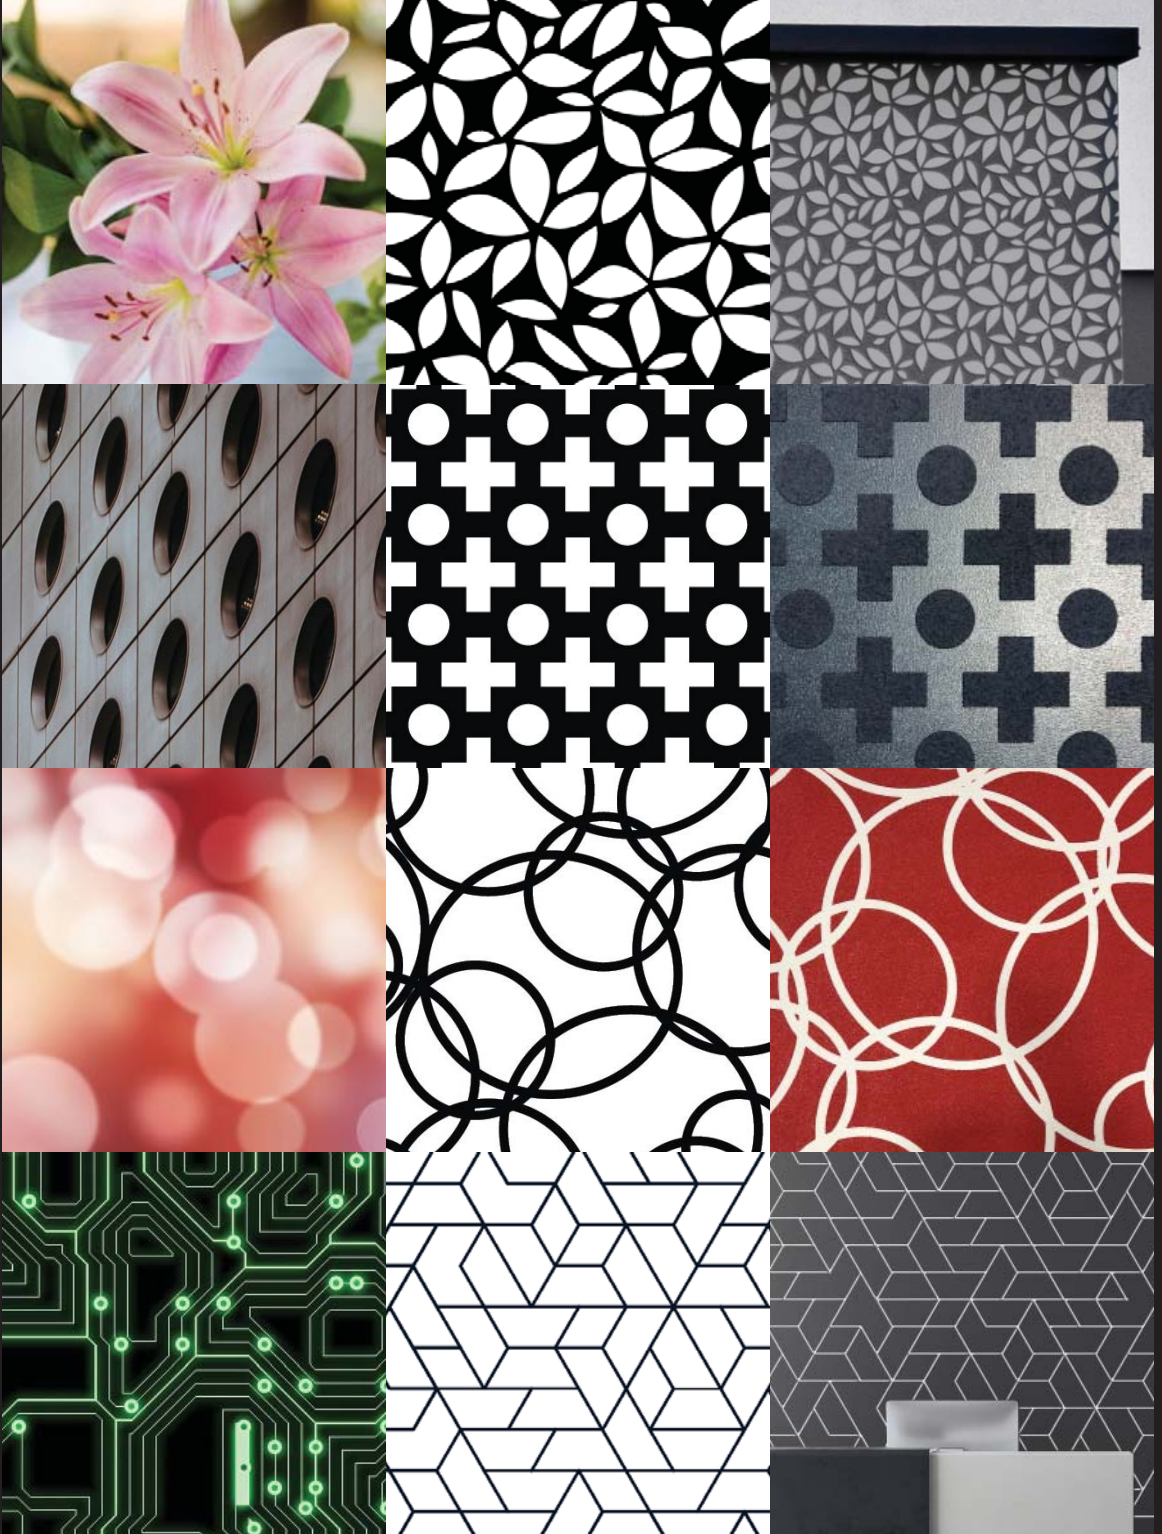

Designers now have a platform to create unique shapes and graphic effects on both interior and exterior wall elevations.

By designing with the occupant, building style, and geographic location in mind STENCILEX produces a custom-patterned finish coating that uniquely compliments and connects each of these influences.

DESIGNING WITH STENCILEX

- > Find some inspirational designs
- > Incorporate the design into your digital software
- > Create a repeating pattern using our STENCILEX guidelines
- > Submit your design to Adex Systems
- > Receive a unique Adex STENCILEX design code for your project
- > The STENCILEX design is installed on your project, using the custom colors and textures you select
